

HYDERABAD, 1st DECEMBER, 2018– MENLOPARK TECHNOLOGIES PRIVATE LIMITED is pleased to announce its collaboration with KAYA INSTRUMENTS.

MENLOPARK TECHNOLOGIES have formed a strategic partnership with **KAYA INSTRUMENTS**, by taking up distribution rights of selling and serving the products of **KAYA INSTRUMENTS** in **INDIA**.

ABOUT KAYA INSTRUMENTS:

KAYA Instruments is a privately held global company which was founded in 2008 by vision industry professionals.

It serves a global audience in the machine vision and broadcasting market with proprietary products and solutions. The company designs and manufactures internally to ensure the highest quality, inline with clients' highly specific needs.

Many of KAYA Instruments' systems are field-customizable, making them continuously compatible with clients' changing needs. Sophisticated software tools, including rich GUI and featured SDK, integrated with industry leading cameras and acquisition systems, allows customers incredible products for a reasonable price tag. The company follows strict rules of quality control, for all aspects of design, manufacturing, operations and support.

ABOUT MENLOPARK:

MENLOPARK is India's leading supplier of Embedded System Software, Firmware and Hardware in India, APAC and USA.

Menlopark Technologies was born at the nexus of two powerful trends; Embedded Systems, and Automotive Electronics evolution. After launching our Embedded Engineering Solutions in 1994 as a part of the Embedded Software Development Systems Private Limited family we saw the opportunity, or

more precisely the need, to provide highly integrated software and hardware solutions that accelerate time to market.

Our one-stop service for embedded systems development encompasses not only RTOS, compilers and debuggers, but also various other services, such as design automation, software test automation, AUTOSAR and in-vehicle infotainment systems.

The strategic partnership with KAYA INSTRUMENTS is to serve the customers and clients across the country and to continuously deliver better services to support MACHINE VISION INDUSTRIAL and BROAD CASTING INDUSTRIES.
